

Remarks on the Arrangement of the Catalogue

All the names, years of publications, page numbers and other data included in the catalogue have been carefully checked with the original literature. The names of subfamilies and genera are given as headings; after them, there are type genera (for subfamilies) and type species (for genera), as well as synonyms (also with their type genera and type species). The valid specific name is followed by the name of its author, year of publication and page on which it appeared.

The type depository of all the species, if not revised, is given as published, or the respective collections in which they are held are quoted as in Horn et al. (1990) and Háva (2015).

Citations of papers consist of the author's name and year of the publication. When more than one cited paper have been published in the same year by a given author, then the first one is marked by the addition of the letter a, the second by the letter b, etc.

An alphabetical list of synonyms, names of species transferred, nomina nuda, and invalid names, used in the combination with a given generic name or its synonym, is given within each genus after the list of the known species.

Acronyms in the catalogue:

AF	Africa
AMN	north America
AM	central and south America
AS	Asia
AU	Australia, Oceania
EU	Europe
C	central
E	east
N	north
S	south
W	west
I	Island
Is	Islands

NT	number of taxons
----	------------------

ab.	aberration
f.	form
comb.	combination
(hn.)	homonym
incl.	including
intr.	introduced
(in)	invalid name
litt.	in litteris (unpublished)
n.	novum
(nd)	nomen dubium
(nn)	nomen nudum
(no)	nomen oblitum
nom.	nomen
rn	replacement name
[sic!]	error or misspelling
