

Excluded fossil genera

The both following genera with species excluded from Dermestidae and transferred to Schizocoelidae by Martin (2010).

Genus *Reeveana* Dunstan, 1923:48 [NT 3]

Type species: *Reeveana minor* Dunstan, 1923:50

List of species

†*Reeveana intermedia* Dunstan, 1923:49 [?]

Distribution: **AU**: Australia: Queensland (fossil: Late Triassic)

†*Reeveana major* Dunstan, 1923:48 [?]

Syn.: *Reeveana major*: Jell, 2004:74

Distribution: **AU**: Australia: Queensland (fossil: Late Triassic)

†*Reeveana minor* Dunstan, 1923:50 [?]

Distribution: **AU**: Australia: Queensland (fossil: Late Triassic)

Genus *Tryoniopsis* Dunstan, 1923:51 [NT 2]

Type species: *Tryoniopsis punctata* Dunstan, 1923:51

List of species

†*Tryoniopsis granulata* Dunstan, 1923:52 [?]

Distribution: **AU**: Australia: Queensland (fossil: Late Triassic)

†*Tryoniopsis punctata* Dunstan, 1923:51 [?]

Syn.: *Tryoniopsis punctata*: Jell, 2004:74

Distribution: **AU**: Australia: Queensland (fossil: Late Triassic)

The following genus excluded from Dermestidae and transferred to family Mycetophagidae as synonym for genus *Litargus* by Háva & Poinar (2021).

Genus *Limniattagenus* Poinar & Háva, 2015:2 [NT 1]

Type species: *Limniattagenus electron* Poinar & Háva, 2015:2

List of species

†*Limniattagenus electron* Poinar & Háva, 2015:2 [ORUC]

Distribution: **AM**: Dominican Republic (fossil: Dominican amber)
